

WHEEL
ALIGNMENT

Vamag
VECTOR

4-WHEEL ALIGNER

With over **30 years experience** in alignment, **VAMAG** offers a range of **high quality** computerised systems.

VECTOR makes car wheel alignment **quick** and **easy** within an **affordable budget**.

FEATURES

- **Wireless:** Bluetooth™ data transfer
- **Quick and easy:** vehicles measured in minutes
- **Database:** contains more than 15,000 vehicles
- **Customer printout:** shows results before and after adjustment
- **Haweka Pro-Clamps:** no run-out compensation needed
- **Multiple additional features:** e.g. spoiler tilt facility

Measurement screens

show real-time data. The user friendly software guides the technician through the alignment process. All measurements are compared with the manufacturer's spec, including on the colour printout.

SYSTEM CONTENTS

- 4 measuring heads on Haweka Pro-Clamps
- Mobile workstation with PC, printer, screen and keyboard
- 24" colour monitor
- Recharging system
- Brake pedal depressor
- Steering wheel lock
- Pair of high quality turn plates

ACCESSORIES

A range of accessories are available from Vamag UK to ensure the system meets your needs. This includes run-up ramps, turn plates, steering wheel level, adjustment diagrams, alignment tables and extension feet.

Haweka

Pro-Clamps

included as standard. Their precise positioning mechanism means that no run-out compensation is needed. And with feet made of engineering plastic, alloy rims will not be scratched.
